AI POWERED HOTEL MANAGEMENT SOLUTION

BY E-WORLD

Transforming Hospitality Through Artificial Intelligence

✓**255+ Comprehensive Features**
✓**115+ AI-Powered Capabilities**
✓**Full Arabic & English Support**
✓**Vision 2030 Aligned**

Supporting Saudi Arabia's Digital Transformation in Hospitality

Executive Summary

E-WORLD is proud to present a revolutionary hotel management ecosystem that seamlessly combines operational excellence with cutting-edge artificial intelligence. Our platform represents the future of hospitality management in the Kingdom of Saudi Arabia.

Unlike conventional systems that merely digitize existing processes, our AI-first approach transforms how hotels operate—predicting needs before they arise, automating complex workflows, and delivering insights that drive profitability.

Built specifically for the Saudi market, our platform aligns perfectly with **Vision 2030's** objectives of digital transformation, tourism sector growth, and sustainable operations.

> ⬚ **Our Commitment**
>
> *We deliver a perpetual license model that gives you complete ownership of your software platform, with flexible AI capabilities that scale with your business needs. No vendor lock-in, no hidden costs—just transparent, value-driven technology partnership.*

The Saudi Hospitality Revolution

Saudi Arabia's hospitality sector is experiencing unprecedented transformation:

Economic Impact

- Tourism sector projected to contribute SAR 280+ billion to GDP by 2030
- 100+ million annual visitors targeted under Vision 2030 initiatives
- Hajj & Umrah pilgrims exceeding 30 million visitors per year
- Mega-projects like NEOM, Red Sea, and Qiddiya driving hotel expansion
- Government investment of SAR 1+ trillion in tourism infrastructure

Digital Transformation Imperative

- Mandatory digitalization of government-facing tourism operations
- Rising guest expectations for contactless, personalized experiences
- Competition from international hotel chains with advanced technology
- Need for real-time data analytics and predictive insights
- Sustainability reporting requirements for Vision 2030 compliance

Hotels that adopt intelligent systems today will dominate tomorrow's market. Our platform positions you at the forefront of this digital revolution.

Our Platform: Comprehensive Hotel Management Ecosystem

E-WORLD delivers an end-to-end solution covering every aspect of hotel operations, from guest booking to financial reporting. Our platform integrates 255+ features across 20 comprehensive modules, ensuring nothing falls through the cracks.

1. Booking & Reservations Management

Complete guest booking lifecycle from inquiry to checkout:

Online Booking Engine	Mobile-optimized booking for direct reservations with real-time availability
Multi-Property Support	Manage multiple hotels from a single dashboard with centralized control
Channel Manager Integration	Seamless sync with Booking.com, Expedia, Agoda, and 50+ OTAs
Room Type Management	Configure unlimited room categories, packages, and seasonal rates
Group Bookings	Special handling for corporate accounts, weddings, and pilgrimage groups
Waitlist Management	Automatic notification when desired rooms become available
Booking Modifications	Guest-initiated changes, upgrades, extensions, and cancellations
Early Check-in/Late Checkout	Flexible timing with automated pricing adjustments

2. Room & Property Management

Real-time visibility and control over your entire property:

Room Status Dashboard	Live tracking: available, occupied, cleaning, maintenance, blocked
Interactive Floor Plans	Visual property maps showing real-time room status by floor/wing
Room Assignment	Manual or automated allocation based on preferences and VIP status
Room Transfer	Seamless guest moves with automatic billing adjustments

Occupancy Analytics	Historical trends, forecasting, and optimization recommendations
Rate Management	Dynamic base rates, seasonal pricing, and special event adjustments
Room Blocking	Reserve rooms for maintenance, VIPs, or special events
Virtual Tours	Upload 360° room photos for enhanced guest booking experience

3. Housekeeping & Cleaning Operations

Streamline cleaning operations for faster room turnover:

Task Assignment	Automatic distribution based on staff location, workload, and shift
Mobile App for Staff	Real-time task updates, status changes, and issue reporting
Cleaning Schedules	Prioritized queues for checkouts, VIPs, and early arrivals
Inspection Workflows	Quality control checklists with photo documentation
Minibar Management	Consumption tracking and automated restocking alerts
Lost & Found	Digital registry with photos, guest matching, and storage tracking
Deep Cleaning Calendar	Scheduled maintenance cleans with completion tracking
Performance Metrics	Individual and team productivity analytics and rankings

4. Inventory & Supply Chain Management

Complete control over all hotel supplies and assets:

Multi-Category Tracking	Linens, toiletries, F&B supplies, cleaning materials, equipment
Stock Level Monitoring	Real-time quantities with low-stock alerts and reorder points
Supplier Management	Vendor database, pricing history, and performance ratings
Purchase Orders	Automated PO generation, approval workflows, and receiving
Consumption Analytics	Usage patterns by department, season, and occupancy level
Waste Tracking	Monitor spoilage, breakage, and inefficiencies for cost control
Asset Management	Furniture, equipment, and technology with depreciation tracking
Barcode/QR Scanning	Fast mobile check-in and check-out of inventory items

5. Staff & Human Resources Management

Comprehensive workforce management from hiring to retirement:

Employee Database	Complete profiles with contracts, documents, and certifications
Attendance System	Biometric/mobile clock-in with GPS verification for remote staff
Shift Scheduling	Drag-and-drop calendar with auto-conflict detection
Leave Management	Request, approval, and balance tracking for all leave types
Payroll Processing	Automated salary calculation with overtime, deductions, and bonuses
Performance Reviews	Goal setting, evaluations, and improvement plan tracking
Training Management	Course assignments, completion tracking, and certification renewal
Internal Communication	Announcements, policies, and document sharing portal

6. Financial Management & Accounting

Complete financial visibility and control:

Revenue Management	Room revenue, service charges, F&B, spa, and ancillary income
Expense Tracking	Categorized expenditure monitoring by department and project
Budget Management	Annual budgets, variance analysis, and forecasting
Profit & Loss Reports	Daily, weekly, monthly, and annual P&L statements
Tax Calculation	Automatic VAT/tourism tax computation and reporting
Accounts Payable	Vendor invoices, payment scheduling, and reconciliation
Accounts Receivable	Guest folios, corporate billing, and collection management
Financial Dashboards	Real-time KPIs: ADR, RevPAR, GOPPAR, occupancy rates

7. Maintenance & Engineering Management

Proactive maintenance to minimize downtime and extend asset life:

Work Order System	Request submission, assignment, tracking, and completion logging
Preventive Maintenance	Scheduled servicing for HVAC, elevators, pumps, and equipment
Asset Registry	Complete equipment database with specifications and service history
Vendor Management	Contractor database, performance ratings, and contract tracking
Spare Parts Inventory	Critical parts stock with usage history and reorder automation
Emergency Protocols	Priority escalation for critical repairs affecting guest experience
Warranty Tracking	Expiration alerts and claim filing for covered equipment
Energy Monitoring	Utility consumption tracking and efficiency improvement identification

8. Guest Experience & CRM

Build lasting relationships through personalized service:

Guest Profiles	Comprehensive history including preferences, spend, and feedback
Preference Tracking	Room type, temperature, pillow, minibar, dietary requirements
Communication History	All interactions across email, SMS, WhatsApp, and phone
Loyalty Program	Points accumulation, tier management, and reward redemption
Special Occasions	Birthday, anniversary, and VIP event recognition and surprises
Feedback Management	Post-stay surveys, review solicitation, and complaint resolution
Review Aggregation	Centralized display of TripAdvisor, Google, Booking.com reviews
Guest Segmentation	Targeting for promotions based on behavior, value, and preferences

9. Food & Beverage Management

Comprehensive restaurant and room service operations:

Menu Management	Multi-outlet menus with pricing, photos, and allergen information
Order Management	Room service and restaurant orders with kitchen routing
Table Reservations	Online booking, waitlist management, and seating optimization
Recipe Management	Ingredient lists, portion control, and cost calculation
Kitchen Display System	Real-time order tracking and preparation time monitoring
Special Dietary Tracking	Halal, vegan, gluten-free, and allergy management
Meal Packages	Breakfast included, half-board, full-board package management
F&B Revenue Analytics	Sales by outlet, item popularity, and profitability analysis

10. Transportation Services

Seamless guest transportation and fleet management:

Booking System	Guest-initiated requests for airport transfers and local transport
Fleet Management	Vehicle registry, maintenance schedules, and insurance tracking
Driver Assignment	Automatic dispatch based on availability and location
Trip Tracking	Real-time GPS monitoring and estimated arrival time updates
Ride History	Complete trip logs for billing and performance analysis
Fuel Management	Consumption tracking, refueling logs, and efficiency monitoring
Vehicle Maintenance	Service schedules, repair history, and inspection documentation
Billing Integration	Automatic folio posting for airport pickups and paid rides

11. Payment Processing & Billing

Secure, flexible payment solutions for modern hospitality:

Multi-Gateway Support	Integration with all major Saudi payment gateways (Mada, STC Pay)
Payment Methods	Credit/debit cards, mobile wallets, bank transfers, cash, corporate billing
Deposit Management	Advance payments, security deposits, and refund processing
Split Billing	Multiple folios for groups, shared rooms, and expense separation
Currency Conversion	Multi-currency support with real-time exchange rates
Invoice Generation	Professional itemized invoices in Arabic and English with VAT
Receipt Management	Digital receipts via email, SMS, and WhatsApp
Payment Reconciliation	Automated matching of payments to reservations and folios

12. Reporting & Business Intelligence

Data-driven insights for strategic decision making:

Occupancy Reports	Daily, weekly, monthly occupancy rates with trend analysis
Revenue Reports	ADR, RevPAR, GOPPAR, and revenue breakdown by source
Guest Analytics	Demographics, booking patterns, and loyalty segmentation
Channel Performance	OTA vs direct bookings with commission analysis
Departmental P&L	Profit and loss by rooms, F&B, spa, and other revenue centers
Staff Productivity	Performance metrics by department and individual
Custom Dashboards	Configurable KPI displays for executives and managers
Export Capabilities	PDF, Excel, CSV formats for sharing and further analysis

AI-Powered Intelligence: The Game Changer

While our comprehensive manual features ensure complete operational control, our **115+ AI capabilities** transform your hotel from reactive to predictive, from manual to automated, and from profitable to highly profitable.

⬚ The AI Advantage

Our artificial intelligence doesn't just automate tasks—it learns from your operations, predicts future needs, and provides actionable insights that would take human analysts days to discover. This is the competitive edge that separates market leaders from followers.

AI Revenue Optimization

Dynamic Pricing Engine

Maximize revenue through intelligent, real-time price optimization:

- **Market-Aware Pricing:** Continuously monitors competitor rates and adjusts your pricing to maintain optimal position
- **Event Intelligence:** Automatically increases rates during Hajj, Umrah, F1 races, concerts, conferences, and local events
- **Demand Forecasting:** Predicts booking patterns 6-12 months ahead based on historical data and market trends
- **Channel Optimization:** Different pricing strategies for direct bookings vs. OTAs to maximize revenue and minimize commission
- **Length-of-Stay Pricing:** Adjusts rates based on booking lead time, stay duration, and property availability

⬚ Revenue Impact

Hotels using our dynamic pricing engine see 15-35% increase in Revenue per Available Room (RevPAR). One Riyadh hotel client increased annual revenue by SAR 4.2 million without adding a single room.

Intelligent Upselling & Cross-Selling

AI identifies and capitalizes on revenue opportunities:

- **Upgrade Recommendations:** Suggests room upgrades at booking based on guest history and willingness to pay
- **Service Prediction:** Proactively offers spa, dining, or transportation services based on guest profile
- **Timing Optimization:** Sends offers at the moment guests are most likely to accept

AI Guest Experience Enhancement

24/7 Multilingual AI Chatbot

Instant, intelligent guest communication in perfect Arabic and English:

- **Natural Language Processing:** Understands guest intent even with colloquial language and handles complex, multi-part questions
- **Booking Assistance:** Completes entire booking process conversationally including room selection, dates, and payment
- **Special Request Handling:** Processes requests for halal food, prayer room proximity, gender-segregated areas, and accessibility needs
- **WhatsApp Integration:** Operates seamlessly on Saudi Arabia's preferred communication platform
- **Voice Interface:** Voice commands for in-room controls (lights, AC, curtains) in both languages

> ⚡ **Efficiency Gain**
>
> *AI chatbots handle 70-80% of routine inquiries, reducing response time from hours to seconds. This frees your staff to focus on high-value guest interactions while ensuring 24/7 availability.*

Guest Behavior Prediction & Hyper-Personalization

Create memorable experiences through predictive intelligence:

- **Preference Learning:** AI remembers room temperature, pillow type, minibar preferences, and dining habits
- **Service Anticipation:** Predicts when guests will likely need spa, transportation, or restaurant services
- **Proactive Personalization:** Prepares rooms exactly to guest preferences before arrival without them asking
- **VIP Recognition:** Facial recognition automatically identifies returning guests and notifies staff
- **Celebration Automation:** Remembers birthdays, anniversaries, and triggers special surprise arrangements

Sentiment Analysis & Reputation Management

Monitor and respond to guest feedback proactively:

- **Real-Time Review Analysis:** Scans reviews in Arabic and English from all platforms within minutes of posting
- **Social Media Monitoring:** Tracks mentions, tags, and sentiment across Twitter, Instagram, and Facebook
- **Issue Detection:** Identifies emerging problems before they escalate (e.g., multiple AC complaints)
- **Response Generation:** Drafts personalized, empathetic responses to reviews for manager approval
- **Satisfaction Scoring:** Tracks sentiment trends by department to identify training needs

AI Operational Efficiency

Smart Housekeeping Optimization

Transform housekeeping from reactive to intelligent:

- **Optimal Route Generation:** AI creates most efficient cleaning paths saving 20-30 minutes per shift per person
- **Priority-Based Queuing:** Automatically prioritizes VIP rooms, early check-ins, and high-revenue guests
- **Time Prediction:** Estimates cleaning duration based on room type, guest stay length, and historical data
- **Smart Assignment:** Assigns tasks based on staff location, expertise, and current workload
- **Performance Analytics:** Identifies top performers and training needs through quality scores and speed metrics

> ⓘ **Productivity Boost**
>
> *AI housekeeping optimization reduces room turnover time by 25-40%, enabling hotels to sell more room-nights and accommodate early check-ins without adding staff.*

Predictive Maintenance

Prevent equipment failures before they happen:

- **Failure Prediction:** AI analyzes equipment sensor data and usage patterns to predict AC, elevator, and plumbing failures
- **Optimal Scheduling:** Schedules maintenance during low-occupancy periods to minimize guest disruption
- **Cost-Benefit Analysis:** Recommends repair vs. replacement based on projected costs and equipment lifespan
- **Warranty Tracking:** Alerts before warranties expire and ensures covered repairs are claimed
- **Performance Monitoring:** Tracks efficiency degradation (e.g., AC cooling capacity) to schedule service before failure

> ⓘ **Cost Savings**
>
> *Predictive maintenance reduces emergency repair costs by 40-60% and extends equipment life by 20-30%. One Jeddah hotel saved SAR 180,000 annually by preventing major failures.*

Inventory Management AI

Never overstock or run out of critical supplies:

- **Demand Forecasting:** Predicts inventory needs (towels, toiletries, F&B) based on upcoming reservations and historical usage
- **Automated Reordering:** Triggers purchase orders at optimal reorder points considering lead times and bulk discounts
- **Seasonal Adjustment:** Automatically increases inventory for Hajj/Umrah surge and special events
- **Waste Reduction:** Identifies overstock patterns and recommends order quantity adjustments
- **Supplier Optimization:** Analyzes supplier performance (quality, delivery time, pricing) and recommends best vendors

AI Staff Management & Optimization

Smart Shift Scheduling

Optimize labor costs while maintaining service quality:

- **Demand-Based Staffing:** Predicts required staff levels based on forecasted occupancy, events, and historical patterns
- **Preference Consideration:** Accounts for employee prayer times, family commitments, and shift preferences while meeting coverage needs
- **Skill-Based Assignment:** Matches tasks to employees with right skills and certifications
- **Overtime Minimization:** Balances workload to reduce costly overtime while ensuring adequate coverage

Performance Analytics & Retention

Build and retain high-performing teams:

- **Productivity Tracking:** Monitors individual performance metrics and benchmarks against team averages
- **Training Need Identification:** Detects skill gaps through pattern analysis and recommends targeted training
- **Turnover Risk Prediction:** Identifies employees at risk of leaving through attendance patterns, performance, and engagement metrics
- **Recognition Engine:** Recommends rewards and recognition for top performers to boost morale

AI Security, Compliance & Sustainability

Fraud Detection & Prevention

- **Booking Pattern Analysis:** Flags suspicious reservation patterns and potential fraud attempts
- **Payment Fraud Detection:** Identifies stolen cards, chargebacks, and high-risk transactions in real-time
- **Access Monitoring:** Detects unusual system access patterns and potential security breaches

Smart Energy Management (Vision 2030 Alignment)

- **Occupancy-Based Control:** Automatically adjusts HVAC and lighting in unoccupied rooms to reduce waste
- **Weather Integration:** Optimizes temperature settings based on weather forecasts and thermal comfort
- **Peak/Off-Peak Optimization:** Shifts energy-intensive tasks to off-peak hours to reduce costs
- **Carbon Footprint Tracking:** Monitors and reports environmental impact for Vision 2030 sustainability goals

> ### ⧉ Environmental & Financial Impact
>
> *AI energy management reduces utility costs by 20-35% while supporting Saudi Green Initiative goals. This translates to SAR 150,000-500,000 annual savings for medium to large hotels.*

Our platform isn't just translated—it's culturally designed from the ground up for the Saudi market. Every feature considers local customs, regulations, and business practices.

Native Arabic Interface	Right-to-left (RTL) design with proper Arabic typography—not a translation overlay
Bilingual Operations	Seamless switching between Arabic and English for staff and guests
Prayer Time Integration	Automatic scheduling around Salah times for staff shifts and guest services
Qibla Direction	Displayed in all room information and signage for guest convenience
Halal Certification Tracking	Complete F&B ingredient monitoring and halal compliance documentation
Gender-Segregated Facilities	Management tools for family sections, ladies-only floors, and segregated amenities
Hajj & Umrah Surge Optimization	AI-powered capacity planning for pilgrimage season with 10x occupancy spikes
Group Pilgrimage Tools	Specialized booking, billing, and coordination for religious tour operators
Hijri Calendar Support	Dual-calendar system for both Gregorian and Islamic dates
Cultural Compliance AI	Ensures operations align with Saudi customs and regulations automatically
WhatsApp Business Integration	Native support for Saudi Arabia's #1 communication platform
Local Payment Gateways	Full integration with Mada, STC Pay, and all Saudi banking systems
Vision 2030 Reporting	Automated sustainability, tourism, and digitalization metrics for government compliance
Saudi Tourism Platform Integration	Seamless data sharing with official tourism authorities
Arabic Voice Commands	Natural language processing optimized for Saudi dialects
Family-Friendly Features	Special package management for family bookings and child accommodations

---

🏛️ Saudi Market Advantage

While international competitors offer Arabic as an afterthought, our platform is built Arab-first. This isn't just about language—it's about understanding that Ramadan requires different operational strategies, that Hajj season needs 10x surge capacity, and that family accommodations have specific requirements.

Vision 2030: Your Strategic Partner in National Transformation

Saudi Arabia's Vision 2030 isn't just a government initiative—it's a national transformation. Our platform directly supports every pillar relevant to hospitality:

Digital Transformation

- **100% Digital Operations:** Paperless check-in, digital keys, electronic signatures, and cloud-based management
- **AI-First Approach:** Leading the region in artificial intelligence adoption for hospitality
- **Data-Driven Decision Making:** Real-time analytics replacing gut-feel management

Tourism Growth & Diversification

- **Capacity for 100M Visitors:** Scalable infrastructure supporting unprecedented tourism growth
- **Enhanced Guest Experience:** AI personalization creating world-class hospitality competitive with global standards
- **Revenue Optimization:** Maximizing tourism revenue per visitor through intelligent pricing and upselling

Environmental Sustainability

- **Saudi Green Initiative Support:** 20-35% reduction in energy consumption through AI optimization
- **Water Conservation:** Smart monitoring and leak detection reducing waste
- **Waste Reduction:** Inventory optimization minimizing food waste and supply overstock
- **Carbon Footprint Reporting:** Automated environmental impact tracking and reporting

Quality of Life Enhancement

- **Employment Quality:** Better working conditions through intelligent scheduling and workload distribution
- **Skills Development:** AI identifies training needs, upskilling Saudi hospitality workforce
- **Service Excellence:** World-class guest experiences enhancing Saudi Arabia's global reputation

Cashless Economy

- **Digital Payment Priority:** Full integration with all Saudi payment platforms for contactless transactions
- **Financial Transparency:** Digital trail for all transactions supporting economic modernization

Why e-world? Your Competitive Advantage

Choosing a hotel management system is a strategic decision that impacts your operations for years. Here's why forward-thinking hoteliers choose e-world:

AI-First, Not AI-Added	115+ AI capabilities vs. 0-5 in competitors—AI is our foundation, not a feature
Perpetual License Model	Own your software forever vs. endless subscription payments that never stop
Lower Total Cost	50-70% lower cost over 5 years compared to international subscription systems
Arabic Native Platform	Built for Saudi Arabia from day one, not adapted from English systems
Vision 2030 Alignment	Complete compliance and reporting for government requirements built-in
No Vendor Lock-in	Your data is exportable, portable, and always under your control
Hajj/Umrah Expertise	Purpose-built surge management for pilgrimage seasons—unique to our platform
Local Support Team	Arabic-speaking experts based in Saudi Arabia who understand your challenges
Flexible Pricing	Pay only for AI features you use, scale up or down as needed
Rapid Deployment	10-12 weeks to full operation vs. 6-12 months for competitors
Cultural Intelligence	Prayer times, gender segregation, halal tracking—not afterthoughts
Comprehensive Training	3-day onsite + ongoing support in Arabic and English
Future-Proof Technology	Regular updates keeping you ahead of hospitality trends
Proven ROI	Clients see 15-35% revenue increase within first year of operation

> ⏺ **Client Success Story**
>
> *A 120-room hotel in Riyadh implemented e-world in 2024. Within 12 months: RevPAR increased 28%, housekeeping efficiency improved 35%, energy costs decreased 24%, and guest satisfaction scores rose from 7.8 to 9.1. Total first-year ROI: 340%.*

Implementation: Your Success is Our Mission

We don't just sell software—we partner with you for successful transformation. Our proven implementation methodology ensures smooth transition and rapid value realization:

Phase 1: Discovery & Planning (Week 1-2)

- Comprehensive requirements gathering and business process analysis
- System configuration planning and customization requirements
- Data migration strategy and integration planning with existing systems

Phase 2: Installation & Setup (Week 3-4)

- Server infrastructure setup (cloud or on-premise based on your preference)
- Database configuration and security hardening
- Initial data migration from legacy systems

Phase 3: Customization (Week 5-6)

- Branding customization (logo, colors, custom domain)
- Workflow configuration to match your operational procedures
- Integration with payment gateways, channel managers, and accounting systems

Phase 4: Training (Week 7-8)

- 3-day onsite comprehensive training for management and department heads
- Role-specific training sessions (reception, housekeeping, F&B, maintenance)
- Video tutorials and documentation in Arabic and English
- Hands-on practice with test data before live deployment

Phase 5: Testing & Go-Live (Week 9-10)

- User acceptance testing with your staff
- Parallel running with existing system to ensure accuracy
- Phased go-live starting with non-critical functions, then full deployment

Phase 6: Post-Launch Support (Week 11-12+)

- Onsite support during first 2 weeks of live operation
- Daily check-ins and issue resolution
- Performance optimization and workflow refinement
- Transition to ongoing support under your Annual Maintenance Contract

Ongoing Support & Partnership

- **24/7 Support Helpdesk:** Phone, email, and WhatsApp support in Arabic and English
- **Quarterly Training:** Refresher sessions and training for new staff members
- **Regular Updates:** New features, security patches, and performance enhancements
- **Dedicated Account Manager:** Single point of contact for Enterprise clients

Next Steps: Begin Your Transformation

We invite you to experience firsthand how e-world can transform your hotel operations:

1. Schedule a Personalized Demo

See the platform in action with scenarios specific to your property. Our team will demonstrate:

- AI features tailored to your hotel type and size
- Integration possibilities with your existing systems
- Customization options for your brand and workflows
- ROI projections based on your current operations

2. 30-Day Free Trial

Experience the complete platform risk-free with full AI capabilities enabled. Test with real booking scenarios, involve your team, and see the difference.

No credit card required. No obligation. Just pure value demonstration.

3. Custom Proposal Development

After understanding your needs, we'll create a detailed proposal including:

- Feature set precisely matched to your requirements
- Transparent pricing breakdown (license, AMC, AI services)
- Implementation timeline with clear milestones
- ROI analysis specific to your hotel's financial data
